

HD 200 CLASSIC

2C

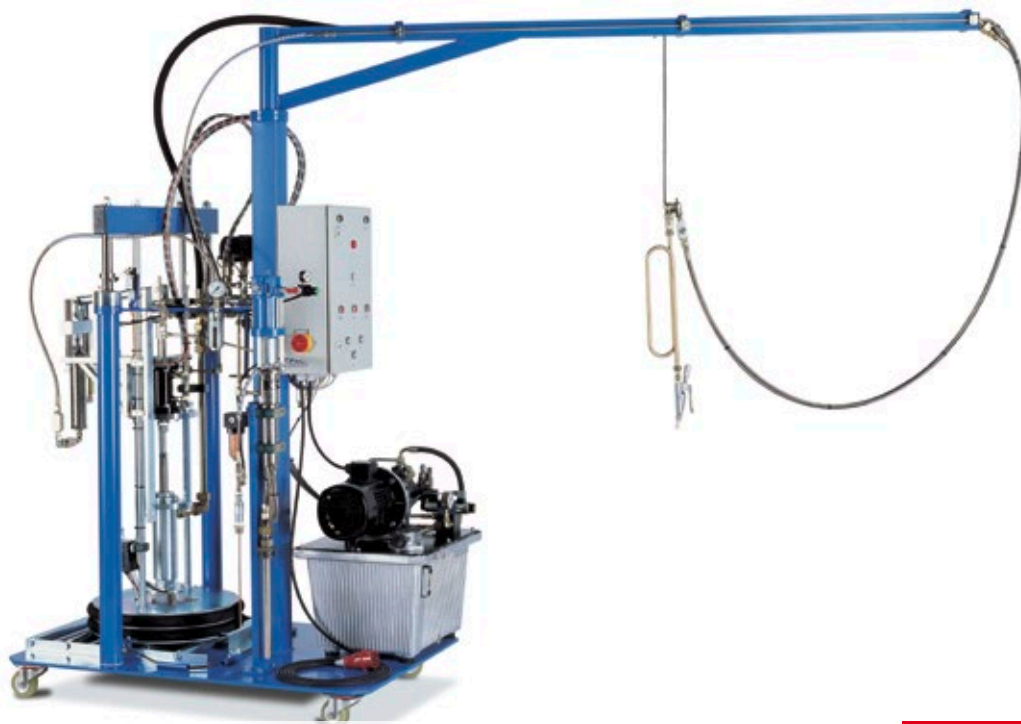

2C – Hydraulic Hand Gunning Machine

Standard Features:

- Low maintenance pump technology
- Mobile Frame
- Variable mixing ratio
- Rollers for ease of barrel change
- One hand mixing ratio control
- Two hand safety operation
- Heater follower plate (Base)
- Potlife control
- "Barrel empty" control
- Boom arm 2500 mm long as standard
- Automatic switch off at excess pressure or lack of material
- Follower plate designed for minimal rest quantity in barrel
- Complete mixing system

Hydraulic and reliable proven technology

Available for PS, PU or silicone

HD 200 CLASSIC

2C

Technical Data:

Output	Approx. 3000 g / min silicone Approx. 4000 g / min (PS) Approx. 5000 g / min (PU)
Electrics	3 x 400V / N / PE, 50Hz CEE Connection 16A
Pneumatics	4 - 8 bar 3/8"
Measurements	1.4 x 0.95 x 2.4 m
Weight	Approx. 650 kg
Construction	Mobile
Output control	Completely variable

Accessories:

- Boom arm with pneumatic support
- Purge Pump for solvent cleaning
- Freezer up to -45°C
- Boom arm with customised length
- Boom arm heating system
- 200 litre hardener unit
- Special colour
- Feed pipes with customised length

The HD 200 classic is a hydraulic hand gunning machine, well proven in the market due to its high output, reliability and technical components.

The integration of many technical control systems guarantees the safety of the operator as well as problem free production runs.

Consequently the standard features are the realisation of operators' requirements. Use of our accessories enables further adoption to individual requirements.
