

HD F32/F45

Freezer with cooling- and heating tanks

The HDT Freezer is equipped with very large cooling and heating tanks, particularly suitable for the fast freezing and thawing of the mixing units with mixed material. The reactivity of the materials is stopped in the cooling tank and subsequently it is reactivated in the heating tank. This enables you to interrupt production at any time.

Advantages:

- No material loss
- Production without solvents
- No disposal problems
- Positive contribution to the protection of the environment
- HD F 32 for PU and PS
- HD F 45 for Silicon

Technical Data:

Contents:	refrigeration and heating tank	55 Litre each
Electrics:		230 Volt / 2,2KW
Temperature:	refrig. tank	- 45°C
	heating tank	+ 40°C
Measurements:		71 x 72 x 125 cm
Construction:		Mobile
Weight:		160 kg
